Alex Crespillo López

Predoctoral researcher in hydrological drought and climatology

Pyrenean Institute of Ecology (IPE-CSIC), Zaragoza, Spain | alex@ipe.csic.es
ORCID 0009-0009-3918-8702 | GitHub AlexCrespillo | alexcrespillo.github.io/Webpage | LinkedIn alexcrespillo

I study how hydrological drought starts in some reaches of a river network and propagates to others. I developed an event-based methodology that reconstructs this propagation between nested gauging stations, published in *Journal of Hydrology* and applied at continental scale in Europe and the United States. My work combines large-scale analysis of streamflow series, distributed hydrological modeling and open scientific programming.

CURRENT POSITION

Predoctoral researcher — IPE-CSIC, Laboratory of Climatology and Climate Services (LCSC, lcsc.csic.es), Zaragoza · since January 2025

- Predoctoral contract of the Momentum programme (CSIC).
- PhD candidate at the Faculty of Physics, University of Barcelona. Supervisor: Sergio M. Vicente-Serrano. Expected defence: December 2028.
- Thesis in four parts: the event-based tracking methodology (published), changes in drought propagation over recent decades (in preparation), the physical mechanisms that control it, and its prediction.

RESEARCH EXPERIENCE

Predoctoral researcher — IPE-CSIC, Zaragoza · January 2025 – present

- Development of an event-based method that reconstructs hydrological drought propagation between nested gauging stations from long series of daily streamflow.
- Collaboration with the University of Minnesota (Alexander Michalek) since June 2026 on the evaluation of the distributed hydrological model Tiger-HLM under drought conditions.
- Contribution to the group's climate services on drought, dry spells and extreme precipitation in Spain.
- Release of the method's code as open source (Zenodo, MIT licence).

Master's internship — Andorra Recerca + Innovació (AR+I), Andorra la Vella · September 2023 – February 2024

- Analysis of meteorological and climate data, support for decision-making on environmental and air-pollution measures, and research on atmospheric dynamics in areas of complex orography.

EDUCATION

MSc in Mathematical Engineering and High-Performance Computing (HPC) — UNIR · 2025 – ongoing

MSc in Meteorology — University of Barcelona · 2022 – 2024

- Master's thesis: "Analysis of thermal inversion episodes in the central valley of Andorra and their relationship with meteorological variables and pollutants". Grade: 8.5/10.

BSc in Geology — Autonomous University of Barcelona · 2018 – 2022 · specialisation in Environmental Geology

- Bachelor's thesis: "Characterisation of native hydrogen reservoirs in the Iberian Peninsula".

TECHNICAL SKILLS

- Programming: Python and R. Analysis of hydrological and climate series, extreme-value statistics, machine learning.
- Machine and deep learning: scikit-learn, PyTorch, TensorFlow and Keras.
- Distributed hydrological modeling: Tiger-HLM, numerical experiments and evaluation with forcing ensembles.
- Spatial analysis: ArcGIS, drainage networks derived from digital elevation models.
- Computing: large-scale data processing, GPU use and high-performance computing.
- AI assistants applied to research: Claude (data analysis, code development and scientific writing).

Python | R | scikit-learn | PyTorch | TensorFlow | Keras | LaTeX | Git | Streamlit | Plotly | ArcGIS | GPU / HPC | Claude / AI

COURSES

- 17th Summer School on Machine Learning and Advanced Statistics, Technical University of Madrid.
- Bootcamp on data analysis and artificial intelligence, Upgrade Hub.
- IV Extremadura Congress of Climatology, University of Extremadura.
- Introduction to R and RStudio for data analysis in scientific research, Society of Friends of the National Museum of Natural Sciences.

LANGUAGES

- Spanish and Catalan: native languages.
- English: professional working proficiency. Duolingo English Test 120/160 (CEFR B2), October 2026 — subscores: writing 130, listening 120, speaking 115, reading 115. Cambridge First (B2); preparing Cambridge Advanced (C1).
- French: DELF B2.

ADDITIONAL INFORMATION

- Worked throughout my studies to fund them: customer service and warehouse work in the family business, sports instructor, waiter, kitchen assistant, referee and carpenter.
- Interests: sport, mountains, cooking and travel.
